**LOCAL INLAND EMPIRE BUSINESS TO SELECT TOP BUSINESSES  
TO RECEIVE OFFER OF CYBERSECURITY OR NETWORK  
ASSESSMENT AT NO COST.**

The past year has proven to have experienced more cybercrime than that of years past. One Houston business was ranked as one of the best companies in the nation for cybersecurity as well as other service offerings.

Chino, CA, October 23, 2017– Trinity Networkx is a local managed services firm that specializes in cyber security, disaster recovery and several other components in the technology spectrum that a business will need to effectively implement technology in day-to-day operations.

In an attempt to keep the Inland Empire area as safe as possible during these attacks, Trinity Networkx is offering a cyber security assessment at no cost to select businesses. Representatives from Trinity Networkx will be delivering these offers throughout the month of November.

A recent advancement and surge in the amount of cybercrime has increased the demand for companies with the capacity to assist owners and executives in protecting businesses from being hacked and attacked.

Inland Empire business owners with cybersecurity concerns are urged to call Trinity Networkx at 951-479-1727 to request a cyber security assessment.
